Overview:

Netmetric Solutions is registered in India as **Netmetric Infosolutions Pvt Ltd**. Since 1996, Netmetric Solutions has grown to become India's leader in providing networking/data communications training and solutions. We are widely recognized as the region's trendsetter, consistently delivering quality and setting new industry benchmarks. If you are determined to expand your horizons and drive your business forward, no other organization in can offer you the services and support that we can.

Our **training services** include a wide range of certification programs from Cisco, Checkpoint and Microsoft. We offer more courses, at more times and in more locations than any other company. Businesses and individuals can choose from the course offerings, delivered by experts, and offered in convenient locations around the world.

As an **IT infrastructure solution provider**, Netmetric Solutions understands that networks must be flexible, tailored to meet communication needs, and also aligned with industry standards. Most importantly, we know that networks should simply work – seamlessly facilitating your organizations' changing communication needs. Through a comprehensive range of services, adaptable scale, and in-depth networking expertise, we keep organizations connected and communicating – through their networks.

Vision: *"To be a leading Information Technology Training and Solutions provider in the region by deploying emerging and advanced technologies through our most valuable assets - our people, with continuous commitment to quality and total customer satisfaction, while contributing towards the organizational as well as societal goals and enhancing shareholder value"*

Our areas of specialization and expertise

Our Value Proposition: Netmetric Solutions combines its domain expertise in networking, converged communications, security, storage and contact centre technologies with complementary capabilities in consulting, integration and managed services to help our clients to achieve their business goals

Training Services - We provide comprehensive and cost-effective training for individuals or organizations. With highly experienced and certified instructors, Netmetric Solutions is poised to grant a flexible educational solution that fits your learning style, your budget and your schedule.

Network Integration - We create secure and manageable communications networks, across wired and wireless infrastructure, for both enterprise and service provider applications, to deliver improved end-user performance

Security Solutions - Our portfolio of security solutions supports any organization in creating an adaptable and self-defending secure infrastructure and an architecture that enables effective compliance and risk management, mobility, interoperability and business continuity

Data Centre & Storage Solutions - Our data centre and storage solutions enable organizations to reduce the risk associated with IT disruption, improve operational efficiency and minimize cost and complexity.

IP Telephony Solutions - We integrate traditional communication tools with new collaboration technologies to provide fresh, innovative ways to communicate from any location, using any device to access any application.

Microsoft Solutions - We help organizations to plan, deploy and manage secure, optimized Microsoft desktop and server infrastructures that enable effective communication and collaboration to better achieve business goals.

Services - We apply our best practice approach to the delivery of professional and managed services, to significantly reduce the complexity and risk of managing IT infrastructure.

Why should you consider *partnering* with us?

Our people
